Sustainable choices

All of our flowers and stems are cultivated in Holland, exemplifying our commitment to quality and sustainability. Due to the nature of their longevity, selecting dried flowers is a great eco-friendly choice, reducing the need for frequent replacements and minimizing waste.

To ensure eco-friendly transportation, we employ sea containers for imported products. Our dedication to environmental responsibility extends to the use of water-based dyes and paints sourced from certified providers. Wastewater undergoes meticulous treatment in our water purification plant. Acknowledging waste as a significant source of pollution, we've implemented packaging initiatives, including biodegradable covers, paper-plastic separation, and paper adhesive tape.

Our facility in the Netherlands boasts over 360 solar panels, a testament to our investment in renewable energy. This substantial commitment enables us to nearly meet our electricity needs sustainably. Explore our eco products and allow us to guide you in making environmentally sound choices — it's part of our nature!
